

Ocean Clean Up & Tikkun Olam

Tikkun Olam is the concept that our world is broken and it is our duty to repair it.

Our oceans are very broken--they are filled with pollution that threatens sea life and human life.

700 animal species are severely threatened from plastic pollution in oceans

Our oceans are becoming more acidic because more CO₂ is being absorbed due to trash in oceans

Birds and other animals get trapped by trash and plastic bags

Birds and other animals eat trash in the oceans, making them sick and sometimes die

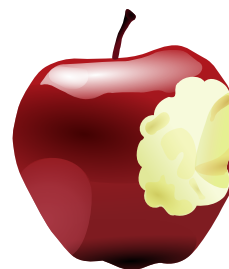

You can help!!

Reduce your one-use plastic (straws, water bottles, toys, utensils)

Don't litter and pick up any litter you find (make sure an adult checks the trash first to be safe)

What other ideas do YOU have for how you can help repair the world by helping clean up the oceans?

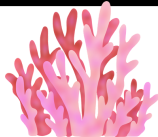

Match the Pollution to How You Can Help Clean it Up!

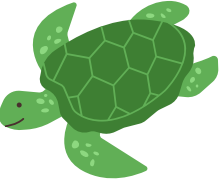

Ocean Clean Up Symbol Count and Graph

Count the number of each symbol and color it in on the graph.
